## NEW PRODUCTS BY VST

Executive Orders VR-203 and VR-204  
Revision T  
ENVIRO-LOC™ Platinum  
EVR Balance Hoses

09.29.16

---

The release of **Executive Orders VR-203 and VR-204 – Revision T** announces California Air Resources Board (CARB) approval of VST's **ENVIRO-LOC™ Platinum** EVR Balance Hoses.

**ENVIRO-LOC™ Platinum** EVR Balance Hoses illustrate VST's continued investment in innovative solutions. These uniquely designed hoses with an anti-stretch cable are aimed at:

- ✓ Protecting customers standing on the forecourt during a drive-off event
- ✓ Protecting station owners' equipment during a drive-off event
- ✓ Improving the life of the hose that has been involved in a drive-off event
- ✓ Reducing or eliminating dispenser meter damage associated with liquid pressure spikes caused during a drive-off event
- ✓ Reducing hose/coupling interface leaks by eliminating end load on the hose assembly
- ✓ Reducing In-Station Diagnostic (ISD) alarms
- ✓ Reducing maintenance expenses

Reducing or eliminating expenses associated with drive-off events are ongoing challenges for gasoline dispensing facilities (GDF). **ENVIRO-LOC™ Platinum** EVR Balance Hoses offer the marketplace a new risk management option to improve a gasoline station owner's total cost of ownership by reducing the costs associated with the above issues.

The video at the following links illustrate the performance of the **ENVIRO-LOC™ Platinum** EVR Balance Hoses.
